Commissioner of Patents and Trademarks
Washington, D. C. 20331

Sir:

This amendment is in response to the last Office Letter.

The cited references and the Examiner's statements
have been carefully considered.

Please cancel claims ~~6~~ and 8.

The patent to Demmer shows similarities to the present
application, but does not meet the specific features in the
present claims. He does not show ^{Not shown in claim 1} metallized plastic and
square tubing, and to combine Ayles with Demmer to ^{no such rejection} antici-
pate these claimed features is not believed proper.

Freeman is not believed to anticipate claim 4, as an
aluminum foil material would not work efficiently.

Claims 9 and 10 are very specific in setting forth a
material "other than translucent" and reciting a "white cap".
